

DON'T SETTLE FOR ANY CONNECTOR, DEMAND SIMPLE SOLDER CONNECTORS!

**Simple Solders' Connectors are a revolutionary new wiring connection system for cable connections and end terminations. The best electronic and electric equipment available on the market becomes useless if not connected properly. Simple Solders provide a high-quality, sealed solder connection that takes the guesswork out of soldering. Soldered terminations provide superior tensile strength and conductivity.**

Ideal for trailer lights and all electrical connections around a boat where a strong waterproof connection is needed.

For your peace of mind our connectors are UL recognized and DIN certified to endure the toughest conditions in the marine, automotive, electronic, solar and aviation industries. From O.E.M. boat builders in state-of-the-art workshops to people on kayaks in the middle of nowhere, anyone can now do a proper solder connection in seconds. Our motto is "Do it once, Do it right".

Our connectors are IP67 and rated from 900 V-2 kV on different units. They meet and/or exceed all ABYC safety standards and are RoHS compliant. The historic use of crimping tools, soldering irons with solder, flux and insulation tape are a thing of the past.

- An extremely quick and permanent join or termination
- Maximum pull-out strength

- Excellent conductivity
- Excellent sealing to prevent corrosion
- Precise soldering with visual inspection possible
- Lead-free solder has greater surface tension
- Solder stays in place which provides greater tensile strength than other solder sleeves
- New solder much less likely to run out of the tubing
- Solder sleeves pre-fluxed to clean metals and provide a quality solder termination

## New & Improved Lead-Free Solder Sleeve

New Solder is Completely Adhesive Lined

Simple Solder Cut-Away View

## Installs Faster

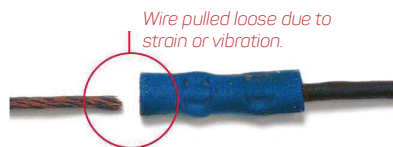

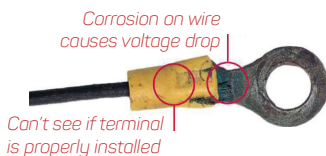

- New lead-free solder has lower melt temperature (138° C vs 145° C)

## No Hazardous Metals

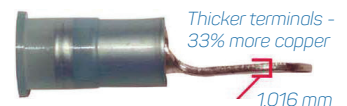

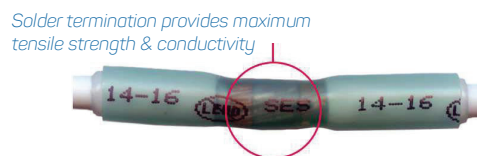

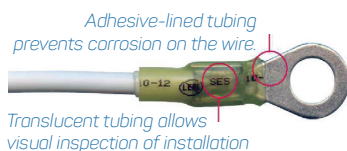

- New solder sleeves are tin & bismuth alloy
- Other solder sleeves contain both lead & cadmium
- New solder RoHS compliant
- Better for the environment

## Reduce Recurring Electrical Problems
