## Warranty Statement

---

Trysome warrants that all products will be covered for manufacturing faults.

All products supplied by Trysome, are supplied and provided on the condition that we cannot be held responsible in the event that they are used for any other purpose than that specified by the manufacturer. Trysome's warranty, therefore, does not cover misuse, abuse, incorrect fitment and applications.

The customer or purchaser accepts that it is their responsibility to ensure that the product is used in accordance with the manufacturer's instructions.

The commencement date of all warranties is the date of invoice to the purchaser unless otherwise agreed by Trysome in writing.

## Service

---

Trysome has its own service department with qualified technicians so that, unlike many wholesalers, we are able to provide you, our Customer, with a complete after-sales service.

### Disclaimer:

- The illustrations and descriptions of parts displayed in this catalogue are intended as a guide to buyers only. You are hereby notified that, whilst this company will take all reasonable care, the company will not be liable for reliance by you on any illustrations and/or descriptions of parts displayed in this catalogue.
- Trysome Auto Electrical (PTY) LTD reserves the right to change terms, conditions and specifications shown in this catalogue at any time.
- Some names and part numbers are used for reference purposes only.
- Some of our products are manufactured to order so please allow for lead times.
- The information contained herein is deemed to be correct at the time of going to print, but Trysome assumes no liability for typographical errors or omissions (E&OE).

## Your feedback is important

---

In a continuous effort to bring you a catalogue of the highest standard and accuracy, we would appreciate your feedback.

Should you notice any mistakes in terms of information, spelling or incorrect images please let us know. Further if there is additional information you would like us to portray, let us know.

Please email your comments to [Lesley.Bennett@trysome.cc](mailto:Lesley.Bennett@trysome.cc)

**Trysome Auto Electrical (PTY) LTD is the authorised distributor of the brands that they market.**

## Field-Proven Reliability

TE Connectivity's Deutsch rugged, all-metal bodies and corrosion-resistant, thermoplastic shells are manufactured from high-quality materials selected for their ability to withstand years of environmental exposure.

TE Connectivity's Deutsch connectors are available in rectangular and cylindrical body shapes and features:

- Wide operating temperature range
- Secure locking mechanisms
- Positive contact retention system

TE Connectivity's Deutsch silicone seals and grommets fit tightly around the wire insulation and at the connector interface to provide redundant barriers to contamination.

In order to create a reliable environmental seal and ensure continuity of flow, TE Connectivity's Deutsch seals:

- Are resistant to most common industrial and engine fluids
- Retain their flexibility across a wide temperature range
- Never require potting or dielectric grease

With integrated seals that are designed to work with multiple wire gauges, TE Connectivity's Deutsch connectors simplify design and inventory management and provide exceptional performance in critical environments.

## Common Contact System

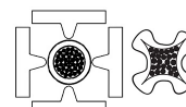

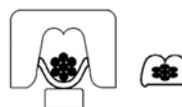

The TE Connectivity's Deutsch Industrial Common Contact System is a unique system of interchangeable and intermateable contacts that can be used in many TE Connectivity's Deutsch industrial connectors.

Contacts are available in solid or stamped and formed (F-Crimped) styles, with plating options including gold or nickel.

Easy-to-use indent crimpers create a gas tight crimp that is resistant to oxidation. This high-quality crimp allows TE Connectivity's Deutsch contacts to provide reliable, low-resistance power and data transmission.
