

34SI Heavy-Duty Alternator

BRUSHLESS RELIABILITY • LOAD DUMP PROTECTION • MORE OUTPUT

The Answer is Here!

The 34SI is the answer for more output & durability in diesel-powered vehicles with large electrical load requirements. Since it is actually engineered for high-vibration applications, the 34SI generates the standard of quality & performance.

Durability and Strength

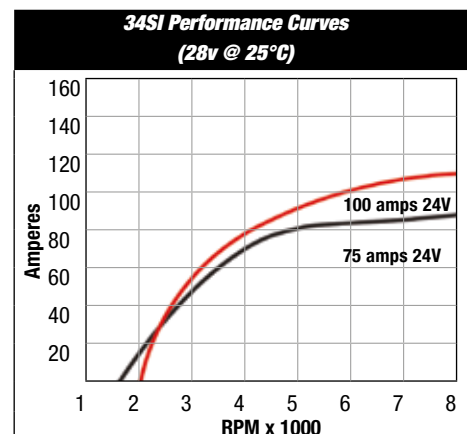

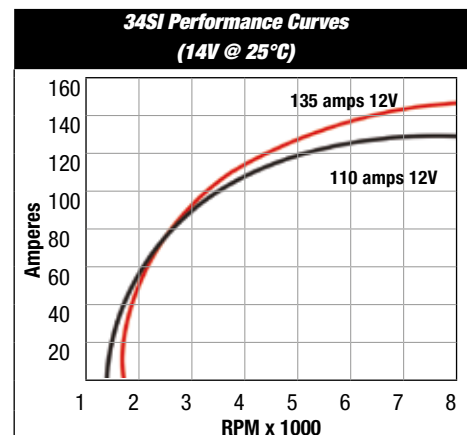

Our 34SI heavy-duty alternator is designed to withstand the increased levels of vibration found in today's high horsepower diesel engines. The sturdy frames are assembled with 1/4"-20, grade 8 bolts for added rigidity and the output, relay and indicator terminals are standard on every machine.

Brushless Construction Increases Service Life

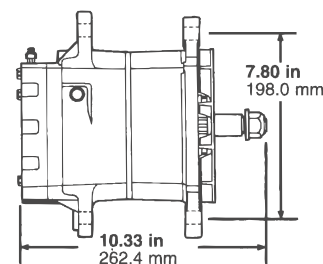

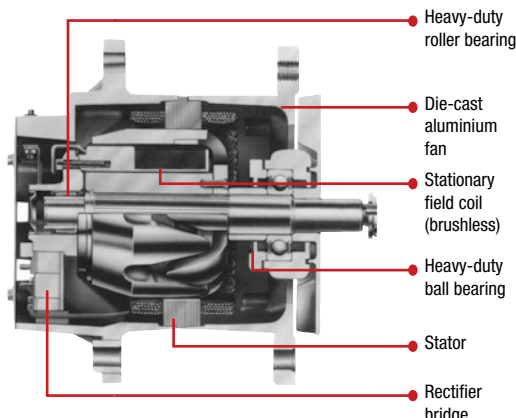

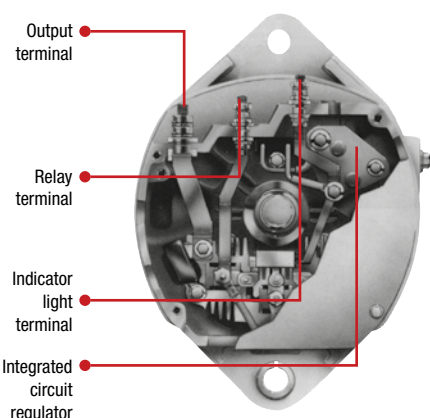

The absence of moving electrical connections eliminates sparks. The 34SI has excellent Radio Frequency Interference (RFI) suppression with very little parasitic draw and low turn-on speed.

Built-in Protection

A special coating protects the electronics from dirt, road salt and other corrosives. The heavy-duty bearings are sealed with plenty of lubricant. Load dump protection prevents external voltage spikes from damaging the unit and in 12-volt models a rectifier bridge clamps voltage spikes at 40 volt to protect vehicle electronic devices.

Performance Output	Rotation	Temp. Limits	Insulated Models Available
135 amps - 12V	CW / CCW	-34°C Ambient	
110 amps - 12V	Maximum Speed	+93°C Ambient	Mounting
75 amps - 24V	10,000 rpm	Polarity	SAEJ180 Hinge
100 amps - 24V	Continuous	Negative Ground	Weight 11.5 kg
	12,000 rpm	Standard	
	Intermittent		

Part Number	OE Number	Volts	Amps	Mount
T021103635A	19011168	24	100	Quad Mount
T021103653DR	10459199	24	100	Quad Mount / Remanufactured

This may not be a stock item. Please speak to our sales representative about lead times. Lead times, price and availability can only be determined on receipt of an official quote from our supplier. This can sometimes take up to 3 days.
