

3000 Series

Universal Mount Back-up Alarm

RUGGED • COMPACT • REVERSE MOUNT SPEAKER TECHNOLOGY • INDUSTRY STANDARD SIZE

The 3000 Series Alarm from Preco exceeds industry standards and provides you with an accurate back-up alarm that produces an audible warning that is +/- 2 dB, far superior to the +/- 4 dB of competitors and SAE requirements.

The 3000 Series alarms utilize reverse mounted speaker technology to increase output while maintaining ruggedness and a small size.

This series comes in two models, one with #8-32 UNC terminal studs and one with 18 gauge wires that are 12" (300mm) nominal in length. Switchable levels are accomplished via either a jumper on the studded version or connecting the grounding leads together on the wired version to switch to the 107 dB level.

Features & Benefits

- Increased reliability and accuracy in a compact form
- Reverse mounted speaker technology
- Suitable for a large selection of vehicles and equipment
- Industry standard size and mounting holes
- Manually adjustable
- Vehicle Life Warranty
