

SUPERNOVA Spot Lights

HELLA VALUEFIT

Hella Valuefit introduces the new **Supernova** spotlight. With the new cutting-edge design and high-powered LED's it creates a spotlight pattern that provides optimal beam distance and spread to create the ultimate driving experience.

The spotlight is available in 6" and 7" and each size features a daytime running light. The perfect fit for all 4x4's, SUV, trucks and off-road vehicles.

Hella offers products that are tailored to your requirements. All **Hella Valuefit** products meet the relevant technical specifications and are safe and reliable.

Hella Valuefit offers entry-level access to LED technology and represents a good solution for converting from halogen to LED technology at a low cost. Compared to halogen lights, LED lights offer considerably better light output. The substantially higher colour temperature of 6,000 Kelvin is very similar to natural daylight. This makes it easier to distinguish between different colours in the dark, and in return prevents the eyes from tiring quickly during the night. **Valuefit** LED lights are completely maintenance-free and offer a much longer service life than the bulb of a halogen headlamp.

EXCELLENT PERFORMANCE,
UNDISPUTED VALUE.

7" Supernova Spot Light
