

Multi-Frequency (White Noise) Surface Mount Back-up Alarms

**WE INVENTED
THE BACK-UP ALARM.
NOW WE'VE GOTTEN SMARTER.**

At ECCO®, safety is our business. We make products that take care of people, so they can take care of business. That's why we stand behind them without exception.

The Multi-Frequency, variable loudness, smart, back-up alarm provides a solution to potential noise pollution created by back-up alarms in confined or densely populated work areas by maintaining a safe warning signal for those in the danger zone of backing vehicles while minimizing disturbance to work-site neighbours. The Multi-Frequency alarm operates by emitting sound at multiple frequencies (white noise) attenuated above 4000 Hz so that the sound is perceived to dissipate more quickly than a conventional pure-tone alarm.

MODEL	VOLTS	DECIBELS	AMPS	APPROVALS
T170314703 9724	12 - 24 V	77 - 97 dB	0.70 A	SAE Type F, CE, R10
T170314705 9070	12 - 24 V	87-107 dB	0.90 A	SAE Type F, CE, R10, IP66
