

CM1000 Remote Shutdown

The **Control Master®** Series 1000 Emergency Shutdown is a safe, secure, remote-control radio shutdown system for mine site vehicles.

The CM1000 is specifically designed for mining applications and operates in a licence-free, secure radio frequency. This ensures a safe, secure operation in all applications.

The handheld transmitter is configured to select a vehicle ID and will lock into that vehicle's receiver only. Confirmation of vehicle ID is given to the operator via LCD display, this ensures that the correct vehicle is selected prior to shutdown.

The handheld battery will last up to 4 days if used for 10 minutes twice an hour, and it will only take 3 hours to recharge.

The radios operate on the 900 MHz band to provide an industrial, robust, line-of-site communications link between the transmitter and receiver for a distance of up to 200 metres. No licence is required; it is free to air.

Features:

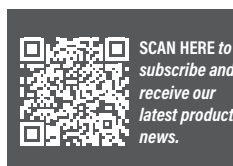

- The system is simple to operate and install.
- The handheld transmitter is fitted with an emergency stop switch.
- 12 and 24 volt installations
- IP65 enclosures
- Park brake interlock is optional
- Globally compliant systems are available.

	Part Number	OE Number	Description
	T7764	APN 7764	Antenna to Suit 9319
	T9319	APN 9319	CM1000 Transceiver 12/24 V
	T9637	APN 9637	Antenna Base to Suit 9319
	T10142	APN 10142	Charger to Suit 10436 and 10143
	T10143	APN 10143	CM1000 TX Hand-held Transmitter 12 Function
	T10436	APN 10436	CM1000 TX Hand-held Transmitter 6 Function
