

Maximise Production by Accurate Payload

The ability to gauge an accurate payload can be the difference between meeting and missing production targets.

The **EarthTrack** External Dual Payload Displays are placed in view of the operator and are designed to assist both loader and digger operators in ensuring production targets are met, every time!

This production tool has been designed to display the payload weights being loaded onto a dump truck on a large digit display mounted to the haul truck. These dual displays relay important information to site, including how much material each truck is moving per shift, day or week; allowing them to keep an accurate record of tonnage.

The **EarthTrack** External Dual Payload Displays can be configured to switch-off once the vehicle is at capacity, or switch-off while the haul truck is travelling.

Part No.:T267515607

Part No.:TBA

Specifications

Display Dimensions 560 mm x 300 mm

Controller Connections Serial and CAN

IP Rating IP67

Controller Fully configurable

Part Number	OE Number	Description
T267515607	4557	LED Fleet Number 4 Digit
TBA	11484	Control External Display Payload Gen 2

Features

- Suitable for CAT, Komatsu and Hitachi haul trucks
- Single or dual display kits available
- Simple to install and maintain
- Built to withstand the harshest conditions

These may not be stock items. Please speak to our sales representative about lead times. Lead times, price and availability can only be determined on receipt of an official quote from our supplier. This can sometimes take up to 3 days.
