

Infrared Forehead Thermometer

The **Safety Solutions Professional Infrared Forehead Thermometer** is used to measure the temperature from the human forehead. This portable digital infrared thermometer can measure body temperatures without touching, so there is no risk of cross infection. The results will display on the screen in one second making it highly efficient.

Features:

- Compact size with large screen
- Measures body temperature with a high accuracy
- Optional settings for °C or °F
- Buzzer function
- LCD display with backlight which means results can be read clearly in the dark
- Automatic range selection; resolution is 0.1 °C
- Data storage function - is capable of storing last 20 measurements making it easy to query data
- Automatically saves data and shuts down after 13 seconds of no operation, saving power
- Infrared sensor with a liquid crystal display (LCD)

Technical Specifications:

Temperature Range	: 33 °C ~ 43 °C
Measuring Distance	: 3 - 5 cm (best measurement is 3 cm)
Automatic Shutdown	: 13 seconds
Measurement Accuracy	: ±0.2 °C
Power Supply	: 3 Vdc
Dimensions	: 154 x 87.7 x 44 mm
Net Weight	: 0.11 kg
Anti-shock type	: Internal power supply equipment
Protection against electric shock	: BF type application part

Although this thermometer is widely used it cannot replace a doctor's diagnosis.

This may not be a stock item. Please speak to your sales representative about lead times. Lead times, price and availability can only be determined on receipt of an official quote from our supplier. This can sometimes take up to 3 days.
