

Monitor any alarm condition on virtually any machine

The **Muirhead®** Engine Protection System (EPS) is designed to monitor practically any alarm condition on virtually any machine. The electronic EPS is smaller in design and integrates more features than all of its previous models. With no mechanical parts, the EPS control module is extremely reliable, easy to install and simple to use. The system follows in the footsteps of its predecessors delivering purpose-built engine protection.

Every EPS control module can be customised to monitor known problems and functions commonly associated with equipment failure. This is one of the many reasons why **Muirhead®** products are the preferred equipment protection systems for Australian and international mines, contractors and Original Equipment Manufacturers.

Note: Additional looms, fittings, switches, lights and siren may be required to perform a complete installation.

Features

- Alarm only, return-to-idle/shutdown modes
- 6 inputs and 3 outputs
- System test function
- Individual fault indicators
- High-quality connectors and mounting bracket
- Custom fault indicator labelling
- Compact and robust control panel design
- Reduces downtime
- Extends machine life
- Substantially reduces the risk of engine failure

	Part Number	OE Number	Description
	T3565-0110	APN 3565	Engine protection system 6 function to suit water-cooled engines
	T3747	APN 3747	Engine protection system 6 function to suit air-cooled engines

These may not be stock items. Please speak to our sales representative about lead times. Lead times, price and availability can only be determined on receipt of an official quote from our supplier. This can sometimes take up to 3 days.
