

Fuel savings across all mobile fleets

Fuel consumption savings across all mobile fleets is now a key KPI.

Most mine managers want to reduce the costs of their operation and they see the reduction in fuel as a key target area.

But the question on their minds is, how do I save fuel without affecting the machine operation and performance?

The **Muirhead®** Fuel Saving Devices do just this. They are designed to interface with machine operating systems and automatically save fuel without affecting machine productivity.

Excess Idle Timers - Prevent excessive unnecessary idling.

Power Economy Bypass - For Komatsu 787 and 785 haul trucks, ensures correct use of the power-economy modes.

Speed Limiters - Ensure constant speed when hauling and remove over acceleration.

RPM Limiting - Ensures the correct power is supplied to perform hoist control.

Idle Timers - Prevent engine and turbo damage but also can be programmed so idle for the correct machine type.

The simple solution to achieve up to 10% savings on fuel is the **Muirhead®** Fuel Saving Product Range.

All systems are simple to install and require very little maintenance.

Features

- Simple to install and maintain
- Suitable for all machine types and brands
- Multi-voltage
- Immediate results
- Machine productivity not sacrificed

	Part Number	OE Number	Description
	T11322	APN 11322	Electronic Brake Application Kit
	T11337	APN 11337	Power Mode Bypass
	T11452	APN 11452	Kit Idle Timer Multi-voltage
	T12362	APN 12362	Controller Excess Idle Shutdown
	T7290	APN 7290	Kit Speed Limiter Generic FBW Dual TPS
