

Costly damage to trays can be prevented

Damage to haul truck trays operating in hazardous areas is all too common and can result in extensive delays in production as well as increasing maintenance costs.

The **Muirhead®** Raised Tray Warning systems can assist in minimising these risks by alerting the operator and/or personnel within the area that the tray is still in the raised position. These systems are available as a warning only, or may limit the truck when the tray is raised to avoid high-speed incidents or accidents.

A truck moving with a raised tray can cause an enormous amount of damage to both infrastructure and machines; resulting in delayed production, large repair bills and an overall loss of profit.

These warning systems are suitable for both underground and surface haul trucks.

Specifications

System Voltage	:	12 to 24 Vdc (reverse polarity protected)
Maximum Current Output	:	10 Amp Continuous
Environmental Rating	:	IP65
Inputs	:	Digital/Analogue
Outputs	:	Digital
Operating Temperature	:	-10 °C to +65 °C
Dimensions	:	199 (l) x 80 (w) x 65 (h) mm

Features

- Multi-voltage
- Audible and visual alarms
- Adjustable tray height detection point
- Neutral input & transmission inhibitor kits are available standard
- Increases operator & workplace safety
- Reduces raised tray related collisions & damage

	Part Number	OE Number	Description
	T8972	APN 12537	Raised tray warning controller only
	T12595	APN 12595	Raised tray warning controller only with transmission inhibitor
	T12729	APN 12729	Raised tray warning kit
	T13643	APN 13643	Raised tray warning kit with transmission inhibitor

These may not be stock items. Please speak to our sales representative about lead times. Lead times, price and availability can only be determined on receipt of an official quote from our supplier. This can sometimes take up to 3 days.
