

## Smarter, Safer Seat Belt Interlocks

Operator safety is of paramount importance in any operation. Operators neglecting to use a seat belt are a hazard to both themselves and the operation. To ensure that the machine cannot be operated unless the seat belt is securely fastened, RCT has developed the **Muirhead® Seat Belt Controller (SBC)**. It is one of the most cost effective, smart technology, seat belt interlock systems in the market.

The controller is programmed so operators apply the seat belt before operation. The **SBC** prevents operation of the machine and if not fitted will immobilise the machine. An audible and visual warning alerts the operator five seconds before immobilisation. The kits are designed to suit all machine types and models.

Customised kits available on request.

	Part Number	OE Number	Description
	TBA	9369	Seat Belt Park Brake Kit with Ignition Module
	TBA	9561	Control SBC with Ignition Module

## Features

- Multi Voltage 8 - 32 V
- Quick installation time
- Programmable engine shutdown time
- Fully sealed product to suit all conditions
- Improves operator safety
- Industry-proven technology

This may not be a stock item. Please speak to our sales representative about lead times. Lead times, price and availability can only be determined on receipt of an official quote from our supplier. This can sometimes take up to 3 days.
