

## Easy Speed Control

The **Muirhead® Speed Gates** are a system designed to improve safety for company equipment and personnel across materials-handling operations.

The technology can be applied to warehouses to safely control forklift speed when entering and exiting through doorways. **Speed Gates** consist of two anchors and are placed at doorways. A Machine Location Tag is installed on the mobile equipment which detects when the piece of equipment has travelled through a gate and signals a **Muirhead® Speed Limiter** to select the predetermined maximum speed allowed in that specific area. The **Speed Gates** can be configured to control up to four separate speeds across a single site. To enable the control of vehicle speed a Machine Location Tag must be interfaced with a **Muirhead® Speed Limiter** and may also be interfaced into any 12/24 Vdc input in third-party devices that may already have the ability to control the speed of the equipment.

	Part Number	OE Number	Description
	<b>TSBMH1119125</b>	11240	Kit Machine Location Speed Gates Control Tag - Generic

## Features

- Speed can be controlled throughout a building with **Speed Gates** at each doorway.
- The system components can operate in a variety of environmental conditions.
- Easy installation and no ongoing maintenance required.

This may not be a stock item. Please speak to our sales representative about lead times. Lead times, price and availability can only be determined on receipt of an official quote from our supplier. This can sometimes take up to 3 days.
