

Downtime due to incorrect park brake use is costly!

Ensuring a machine's park brake is engaged before an operator exits the machine eliminates down time associated with unplanned incidents.

The **Muirhead®** Park Brake Warning System is a preventative action kit designed to stop machines from being left unmanned, in an unsafe condition.

The solution simply alerts the operator and personnel via an audible horn and visual alarm if a machine's door is left open with the park brake off, reminding them to apply the park brake before disembarking the machine.

The kit includes a solid-state controller with a built-in self test upon powering up, a generic wiring harness and one or two proximity switches, depending on what is required. It is simple in design, easy-to-install and suitable for all makes and models of surface and underground machines. An override switch is available to isolate the system during maintenance.

Specifications

System Voltage	:	12 to 24 Vdc (reverse polarity protected)
Maximum Current Output	:	10 Amp Continuous
Environmental Rating	:	IP65
Inputs	:	Digital/Analogue
Outputs	:	Digital
Operating Temperature	:	-10° to +65° C
Dimensions	:	199 (l) x 80 (w) x 65 (h) mm

Features

- Multi-voltage
- Override switch
- Audible and visual warning
- Self-test mode
- Helps prevent unattended machine run-away accidents
- Protects personnel working on & near a machine
- Increases occupational health and safety
- User-friendly
- Simple operation

	Part Number	OE Number	Description
	T11377	APN 11377	Panel Door Open Park Brake
	T11386	APN 11386	Park Brake Warning Kit - Proximity Switch Activated
	T11387	APN 11387	Park Brake Warning Kit Multi-Voltage 1 Door Access
